MAINTHISHA S

B.Tech – Artificial Intelligence & Data Science

mainthishashaswin@gmail.com +91 9994756151 Coimbatore, Tamil Nadu

https://github.com/mainthisha linkedin.com/in/mainthisha

CAREER OBJECTIVE

B.Tech Artificial Intelligence and Data Science student with hands-on experience in Python, Machine Learning, Web Application Development, Cloud Computing, and DevOps. Certified in IBM Machine Learning and skilled in building AI-driven applications, responsive interfaces, and cloud-ready solutions. Passionate about developing scalable, user-centric intelligent systems integrating ML, frontend, cloud, and DevOps technologies.

EDUCATION

Bachelor of Technology (B.Tech) in Artificial Intelligence & Data Science
KGISL Institute of Technology, Coimbatore
2024–2028 | CGPA: 8.1

TECHNICAL SKILLS

Programming Languages: Python, C, C++, Java (Basics), JavaScript, SQL

AI & LLM: LLM APIs, RAG, Prompt Engineering, Embeddings, Vector Databases

Machine Learning & Data Science: Pandas, NumPy, Scikit-Learn, Power BI

Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), FastAPI, Flask, Responsive Web Design, UI/UX Principles, SQLite

Cloud & DevOps: AWS Fundamentals, Docker, CI/CD Pipelines, Clous based deployments, Linux

Tools & Platforms: VS Code, Google Colab, Jupyter Notebook, Git, GitHub

INTERNSHIP EXPERIENCE

UI/UX Intern — InternPe

- Designed responsive UI components for AI-integrated web applications.
- Applied UI/UX principles including layout design, visual hierarchy, typography, and user-friendly navigation.

AI Engineer Intern — Litz Tech

- Developed Lexora AI-Library Management System, an AI-powered solution for managing and retrieving library information.
- Applied AI concepts and programming skills to build practical features and solve real-world problems.

AI Intern — ShadowFox

- Built AI-based applications involving LLM APIs and Retrieval-Augmented Generation (RAG).
- Worked on prompt engineering, AI integration, document processing, and practical AI utilities.

Data Analyst Intern — Thiranex

- Worked on data analysis tasks involving data cleaning, processing, visualization, and insights generation.
- Applied analytical techniques to transform raw data into meaningful conclusions.

Full Stack Web Development Intern — Future Interns

- Developed web applications using frontend and backend technologies.
- Worked on responsive UI development, application functionality, and full-stack implementation.

PROJECTS

Trip Smart – AI-Powered Travel Planning Platform

- Built a full-stack travel planning web app for personalized itineraries, budget management, weather updates, visa planning, and collaborative trip planning.

Corporate Website for a Civil Engineering Company

- Designed and developed a fully responsive corporate website showcasing services, portfolio, blogs, testimonials, vision, and mission. Built with dynamic content management for easy updates, ensuring a smooth and professional user experience.

AuraX'26 – College Tech Fest Platform

- Developed an interactive event management platform featuring personalized event recommendations, real-time seat tracking, live updates, hackathon progress, participant dashboard, AI chatbot support, bookmarks, digital passes, and dynamic filtering.

Neural DevOps Assistant – AI-Driven CI/CD Support Tool

- Currently developing an AI-powered DevOps assistant that helps beginners and students automate project deployment workflows and CI/CD processes, providing guided deployment support and reducing manual configuration effort.

Lexora AI – AI-Powered Library Management System

- Developed an AI-powered library management system that streamlines book management, information retrieval, and user interactions through intelligent search and AI-driven features.

FarmSphere AI – AI-Powered Smart Farming Platform

- Developed an AI-driven smart farming platform combining satellite data, weather information, soil conditions, and historical agricultural data to provide intelligent crop, irrigation, fertilizer, and planting recommendations.

Cognify AI – RAG-Based PDF Learning Assistant

- Developed an AI-powered learning assistant that lets students upload PDFs and ask context-aware questions using document extraction, semantic search, embeddings, vector databases, and Retrieval-Augmented Generation (RAG).

Smart Traffic Management Using AI

- Developed an AI-based traffic management solution that analyzes traffic conditions and optimizes vehicle flow through intelligent monitoring, congestion detection, and automated traffic management.

CERTIFICATIONS

- Google Data Analytics Professional Certificate – Google (2026)
- IBM Machine Learning Professional Certificate – IBM (2026)
- AWS Cloud Fundamentals – Coursera (2025)
- Data Structures & Algorithms – Infosys Springboard (2026)
- AWS Educate Machine Learning Foundations – AWS (2026)
- Tata – GenAI Powered Data Analytics Job Simulation – Forage (2026)
- Deloitte Australia – Data Analytics Job Simulation – Forage (2026)
- BCG – Generative AI Job Simulation
- Building RAG Apps Using MongoDB – MongoDB (2026)

ACHIEVEMENTS

- 3rd Prize – TEXPERIA 2026 – SNS Institute of Technology (2026)

SOFT SKILLS

- Problem Solving
- Communication
- Team Collaboration
- Adaptability
- Time Management
